Experience: 2.5 years

Software Developer   **Dec 2023 – Jul 2025**

Khichad Technologies Pvt. Ltd   **Sikar, Rajasthan, India**

- Frontend Developer with over **1.5 years of experience specializing in Liferay DXP 7.4**.
- Adept at **building, customizing, and maintaining web applications** using Liferay DXP 7.4.
- **Collaborated in the design and development** of the Khichad Technologies website using Liferay 7.4, implementing **responsive UI, web structures, and custom templates** for effective content management and branding.
- Worked on the Al Jadaara project, where I created the website without using the Asset Library, utilizing Structures, Web Content, and Templates for dynamic content management and rendering.
- **Contributed to the TAFE project**, focusing on **upgrading the platform from Liferay DXP 7.0 to 7.4**, with key responsibilities in **frontend migration**, resolving layout issues, and modernizing outdated UI components.
- **Developed and integrated React-based Frontend Client Extensions** to enhance user interaction and extend Liferay's UI capabilities.
- Implemented and managed **Liferay Fragments**, **Templates**, and **Forms** to deliver structured and reusable content components with dynamic capabilities.
- Created **Custom Page Layouts** to support flexible and intuitive content placement and design consistency across pages.
- Specialized in frontend development using Liferay Forms, Fragments, Themes, Templates, and Frontend Client Extensions, along with handling user management and content workflows for scalable and reusable UI components.

Software Developer   **Jul 2025 - Present**

Saptam Technologies Pvt. Ltd   **Jaipur, Rajasthan**

- **Frontend Developer with experience in Liferay DXP 7.4**, specializing in workflow management, portal customization, and React Client Extensions.
- Developed and configured a **multi-level approval workflow using Liferay DXP 7.4** and Kaleo, ensuring requests passed through multiple approvers before final approval.
- Managed **user roles, site roles, and permissions** to implement secure access control and approval rights.
- Built and customized **React Client Extensions, Themes, Fragments, and Templates** to deliver a responsive, modular, and reusable frontend experience.
- Collaborated with cross-functional teams to ensure portal features met business and user requirements, resulting in a scalable and user-friendly solution.
- Collaborated in the development of **the Digital Tribe government portal using Liferay DXP 7.4**, implementing multi-level workflows, user role management and custom themes to ensure a seamless and interactive user experience.

Projects

Khichad Technologies Website [Live Demo]
Role: Frontend Developer

- **Designed and developed** the company's official website using **Liferay DXP 7.4**, ensuring efficient content management and flexible customization through **Structures**, **Templates**, and **Themes**.
- Utilized the Liferay control panel, including SMTP Mail Server settings, for effective email communications.
- **Built dynamic and reusable UI components** using **Fragments, Structures, Templates, and Liferay Forms**, enabling flexible content creation and form-driven interactions.
- **Created and customized themes** using **FTL and CSS**, maintaining brand identity and ensuring mobile responsiveness across all device types.
- **Utilized the Asset Library** to centrally manage and reuse media, documents, and other digital resources across multiple pages and content types.
- **Tech Stack:** Liferay DXP 7.4, HTML, CSS, Bootstrap, JavaScript, FTL, ADT, Themes, Fragments, Templates, Structures, Liferay Forms, Asset Library, User & Role Management, SMTP Configuration.

Al Jadaara (DGE)
Role: Frontend Developer | Domain: Leadership Development (Government Sector – Dubai)

- Developed a dynamic and responsive website for a government leadership development initiative using Liferay DXP 7.4.
- Utilized Asset Library, Web Content, Structures, and Templates for efficient content creation, management, and reuse across pages. Designed structure and templates for seamless content management.
- Designed and implemented responsive layouts ensuring seamless user experience across desktop, tablet, and mobile devices.
- Focused on modular and scalable frontend architecture aligned with Liferay standards and content management capabilities.
- Tech Stack: Liferay DXP 7.4, HTML, CSS, JavaScript, Bootstrap, ADT, FTL, Asset Library, Web Content, Structure, Template.

Digital Tribe
Role: Frontend Developer | Domain: Government

- Developed and configured a multi-level approval workflow in Liferay DXP 7.4, enabling a single request to pass through multiple approvers before final approval.
- Managed user roles, site roles, and permissions to control access and approval rights within the workflow.
- Configured email notifications and status updates at each workflow stage to ensure transparency and timely action.
- Implemented real-time notifications for both students and tutors to stay updated on course activities, assignments, and communications.
- Worked closely with cross-functional teams to ensure that the website met business requirements and user needs.
- Tech Stack: **Liferay DXP 7.4, Kaleo Workflow, User & Role Management, Web Content, Groovy Script.**

TAFE Project
Role: Frontend Developer | Liferay Upgrade (7.0 to 7.4)
- Contributed to the **migration and upgrade of the TAFE portal from Liferay DXP 7.0 to 7.4**, with a primary focus on frontend modernization and component compatibility.
- Redesigned and updated **custom Themes, FTL templates, and Web Content Structures** to align with the new rendering engine and frontend framework enhancements in Liferay 7.4.
- **Resolved UI compatibility issues**, modernized outdated layouts, and integrated **Fragments, Liferay Forms, and React Client Extensions** to enhance modularity and maintainability.
- Tech Stack: **Liferay DXP 7.0 & 7.4, HTML, CSS, JavaScript, FTL, Fragments, Themes, Templates, Structures, Page Layouts, Liferay Forms, Asset Library, React Client Extensions, User & Role Management.**
